

REGULATORY IMPACT ASSESSMENT WORKSHOP Evaluation Summary Findings

Tirana, 11-12 January 2010

**Mr. Qamar Zaman, Instructor
Ms. Anuela Ristani, Director of Operations**

The Seminar aimed at providing general information on the importance of financial sector RIA and how to execute it, based on the EU experience as practiced in the UK.

A recurring issue highlighted through the 2-day session is the consultation process that regulators ought to engage with all affected parties in order to assess the (dis-)advantages of proposed regulatory options so that they can be in a better capacity to draft regulations that achieve their intended effects.

The Seminar's main deliverable was to make participants familiar with the RIA approach (e.g. policy context, procedural and methodological aspects, international case studies illustration and live simulation run by participants).

In order to have a better understanding of the extent at which the workshop addressed the needs of the participants, the latter were asked to complete an evaluation form. The aggregated findings are summarized in the following pages.
